

## Engineer in Mechanical / Process / Chemical Engineering in part-time (m/w)

### The Company:

SIMCHENG Plastics Machinery is a privately-owned Chinese enterprise based in Guangdong, Foshan with approximately 200 employees. With our specialization in cast film lines for CPP, CPE, PVB, EVA and BOPP we have achieved 80% market share in the Chinese market and first place in terms of sales volume for the last 10 years. For several years, we have also been internationally active with branch offices in Germany (Munich), Russia, India, Mexico and Japan.

We are now on the search for an engineer, based in Germany, who is willing to work part-time from home office. The engineering and completion of orders are project-specific.

### Your Responsibilities:

- Consultancy in planning of cast film lines
- Preparation and improvement of CAD drawings
- Individual responsibilities and exchange with international teams
- Longer stay in China possible (1-2 months)

### Your Profile:

- Bachelor or Master's degree in Mechanical Engineering, Process Engineering, Chemical Engineering or equivalent
- Experience in the plastics industry / with cast film lines
- Excellent CAD / SolidWorks skills (drawing proficiency)
- Good written and spoken English knowledge, Chinese knowledge desired
- Knowledge of standard MS Office software

### What we offer:

- Attractive remuneration
- Flexible working hours
- Corporate culture that focuses on working together in partnership
- International contacts
